Simple, Secure HIPAA Compliant Telemedicine

Deliver care from anywhere with KLAS' #1 rated outpatient telemedicine software platform.

Expand your geography and see more patients in less time.

HIPAA Compliant Telemedicine
State of the art security and encryption protocols ensure 100% secure, confidential, and HIPAA compliant virtual visits – while meeting or exceeding all of the U.S. government's requirements without compromising ease-of-use.

Patient & Staff Tech Support
With an average response time of 23 seconds, you, your staff, and patients can get instant support early in the morning or late at night.

Virtual Waiting Room
Increase patient satisfaction by up to 23% with a Netflix-like library of engaging and educational content that's designed to entertain your patients as they wait for their telehealth visit.

Fast HD Connections
Mend's high quality HD audio & video work great on a fraction of the bandwidth to ensure you and your patients have the best experience – even on 3G and 2G networks in rural areas.

No Downloads
No software downloads or installations for your patients to connect. Mend automatically works with most popular browsers with any smartphone, tablet, or computer.

Patient Appointment Reminders
Eliminate no-shows with smart text, email, and phone call appointment reminders. Mend patient reminders use multiple touchpoints to reduce the likelihood of your patients forgetting their appointments.

> *Mend Is a very user-friendly software that provides secure telehealth options. We use the software on a daily basis and it has been very effective. We love that the visits are time managed and that the video quality is good. We have had no issues with logging on or connecting in the 8 months of using the software. Increased ability for provider visits from a far.*
